

BVMS Viewer 9.0

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Live viewing of multiple cameras - benefit from the state-of-the-art video decoding capabilities of BVMS Professional
- ▶ Playback and export from storage - connect to external Bosch storage devices
- ▶ Free of charge up to 16 cameras - load the license, and off you go
- ▶ Forensic search - search for content in the recorded video
- ▶ Live and playback sites - manage multiple locations in an easy way

The BVMS Viewer allows to live-monitor and replay recorded video from Bosch network attached cameras and recorders. The BVMS Viewer supports the current Bosch video product portfolio as well as legacy Bosch video systems. The software package consists of an Operator Client and a Configuration Client. The BVMS Viewer is a variant of the Bosch Video Management System. The free of charge base package includes 16 live only or local storage cameras, 5 Bosch recording solutions and 16 live and playback sites. The system can be expanded with expansion licenses up to 500 cameras and 9999 sites. If enhanced video management functionality is required, the system can easily be upgraded to a BVMS Professional system.

Certifications and approvals

General Data Protection Regulation

The General Data Protection Regulation (GDPR) is enforced on the 25th of May 2018. As a regulation it will be directly applicable to all EU member states without the need for national implementing legislation. As information captured, processed and stored by

video surveillance systems is classified as "sensitive" the GDPR will cause significant impact on the video surveillance installations throughout Europe. BVMS includes the required functionality to ensure an organization can be GDPR compliant, which is further explained in the BVMS - GDPR document, which can be found on the following web page: Bosch Building Technologies Community.

Technical specifications

The release notes give a detailed overview on the changes that are implemented compared to the previous BVMS Viewer version. You can find them on the Bosch Security Systems web page: www.boschsecurity.com

System limits

Maximum number of workstations	1
Maximum number of cameras	500
Maximum number of live and playback sites	9999

Maximum number of DVRs	32
Maximum number of VRMs	32

Software	English, German, Dutch, Italian, Portuguese, French, Spanish, Simplified Chinese, Traditional Chinese, Russian, Hungarian, Japanese, Czech, Danish, Finnish, Greek, Norwegian, Polish, Swedish, Thai, Turkish, Korean, Arabic, and Vietnamese

Hardware recommendations

Cameras

All Bosch cameras can be used under the device compatibility concept, which you can find on the Bosch Security & Safety community in the following article:

How-to: BVMS - Device compatibility.

The list of supported ONVIF cameras can be found on: <http://ipp.boschsecurity.com/bvms>.

If a camera is not listed, testing can be ordered by filling in the custom camera integration form.

Operator Client

Operating System	Windows 10 Professional (64-bit) Spring Creators update (1803) Windows 10 Professional (64-bit) Fall Creators update (1709) Windows 10 Enterprise (64-bit) LTSB 2016 (1607)
CPU	Intel Core i7 4770 3.4 GHz (up to 3.9 GHz)
RAM	8GB
Free disk space	Minimum 3GB for Single Site Systems

	Minimum 5GB for Enterprise Systems
Network	1 Gigabit/s network interface card
Display resolution	Minimum: 1280 x 1024 Recommended: 1920 x 1080
Graphics card	Nvidia Quadro K620 Nvidia Quadro M2000 Nvidia Quadro M4000 Nvidia Quadro P2000 Nvidia Quadro P4000 Intel HD Graphics 530

Storage devices

The storage quick selection guide, which also includes non-Bosch storage devices, can be found on: <http://ipp.boschsecurity.com/bvms>

Device	Series
Bosch DIVAR IP	2000, 3000, 5000, 6000, 7000
Bosch DSA E-Series	2300, 2400, 2500, 2600, 2700, 2800
