

# DCNM-LIPM Interpreting prepare and manage license

## DICENTIS

- ▶ Enables configuration and management of the interpreter desk via the Meeting application, the DICENTIS Webserver, the .NET API and the Conference protocol
- ▶ Enables different interpreting configurations for each meeting

This software license enables the configuration and management of the interpreter desk through the Meeting application, the DICENTIS Webserver, the .NET API and the Conference protocol. Without the DCNM-LIPM license, the interpreter desk can only be configured on the desk itself.

### Functions

The DICENTIS Interpreting prepare and manage license enables technicians to:

- Configure interpreter seats from the Meeting application or the .NET API
  - Assign seats to booths.
  - Assign languages to desks.
  - Set the microphone modes between or within the booth, such as merge, interlock or override.
  - Show an engaged indication within the booth.
  - Show a red blinking microphone button when multiple interpreters are active.
- Configure different interpreting settings per meeting.
- Configure which booths can supply an auto-relay language to output B.
- Control the interpreter desks using the DICENTIS Webserver or the Conference protocol.

- Retrieve status like booth, desk, and languages through the Conference protocol.
- Assign functions to the assignable buttons:
  - Switch between real and elapsed time.
  - Switch between video and presentation.
  - Show an overview of the languages.
  - Signal to speak slow.
  - Select headphones or a headset.
- Configure a button to notify that the current speaker is talking at a pace too fast for simultaneous interpreting. The notification appears when a configurable number of interpreters raises the request, and it remains active for a configurable timeout after the button is released.
- Connect the On-air & teleph. interface, which has a contact output for booth in use notification and two contact inputs for incoming phone calls and warnings, such as CO2 level sensor.

### Parts included

Quantity	Component
1	E-mail with license activation information.
