

LBB4187/00-E Open interface license

www.boschsecurity.com

BOSCH

Invented for life

- For custom build interfaces to control and to configure the system

The DCN Open Interface allows remote control of selected DCN functions via third party equipment and control software. Control data exchange between the DCN system and the remote control device or system is carried out via the Ethernet port on the CCU.

Parts included

Quantity	Component
1	E-mail with license activation information

Technical specifications
