

VideoView+ Services

The VideoView+ services provide an easy-to-use, secure, and cost-effective solution to remotely connect to your Bosch cameras and DIVAR IP all-in-one systems from anywhere and at any time. Leverage the power of the Bosch cloud to monitor your premises and get notified about any incidents.

Functions

Connect your Bosch IP cameras and DIVAR IP all-in-one systems to Remote Portal to easily and securely access them with Video Security Client from all over the world. All camera connections and DIVAR IP connections are outbound and do not require port-forwarding settings.

Live view

The VideoView+ services enable live remote streaming of up to eight concurrent IP cameras via Video Security Client or up to four concurrent cameras on the Android and iOS app clients. Furthermore, the VideoView+ services allow smooth control of PTZ cameras.

Access to recordings

- Replay and export recorded video of up to eight cameras simultaneously from a DIVAR IP device or SD card source.
- Use forensic search on cameras with Bosch video analytics support to define search criteria and look for recorded events.

- ▶ Remote access to live video with Video Security Client
- ▶ Access to recordings and forensic search
- ▶ Instant push event notifications (iOS and Android) and event list for VideoView+ for cameras
- ▶ 10 seconds event clip cloud recording for VideoView+ for cameras

VideoView+ for cameras: Event notification

The event notification feature remotely informs users about triggered events via push notifications with Video Security Client.

Improve real-time decision making by optimizing your remote monitoring setup with VideoView+ for cameras:

- Generate event lists (all OS platforms).
- Manage incidents and critical events on monitored sites.
- Enable push alarm notifications (iOS and Android) for swift and effective responses to alarm events.
- Benefit from 10-second event clip cloud recording with a 30-day retention time, keeping essential evidence safe for future investigation.

VideoView+ for DIVAR IP: Dynamic Transcoding

The Dynamic Transcoding technology, available on DIVAR IP systems, allows you to view your video immediately. Dynamic Transcoding decodes and re-encodes the data stream to a lower rate bit stream tailored to the bandwidth of the connection. When the video is paused, the instant detail enhancement feature instantly displays the full resolution video.

VideoView+ for DIVAR IP: Managing ONVIF cameras

VideoView+ for DIVAR IP allows you to manage ONVIF cameras, connected to a DIVAR IP system, providing live view and access to the recordings.

Regulatory information

i Notice Disclaimer

This software is not designed, intended, or authorized for use in any type of system or application in which the failure of the software could lead to a risk to health and safety. The user is responsible to verify that the software and its specified functionalities are suitable for the intended application, in particular with respect to accuracy, safety and security.

Technical specifications

Dependencies

i Notice

VideoView+ services can only be used with Video Security Client.

Video Security Client	<p>The app works on smartphones, tablets, and laptops running</p> <ul style="list-style-type: none"> • Android 9.0 or later with OpenGL ES 3.0 or later • iOS 13 or later • Microsoft Windows 10.1607 "Anniversary Update"(64-bit) or later
-----------------------	--

Connectivity

Network	<p>For best performance, a fixed internet connection should be used to connect devices to Remote Portal. Cellular internet connections may be used but they can impact performance or availability.</p>
Browser	<p>The browser-based interfaces of Remote Portal are best displayed with contemporary browsers:</p> <ul style="list-style-type: none"> • Google Chrome • Firefox • Microsoft Edge <p>NOTE: JavaScript must be enabled.</p>

Compatibility

Device	Minimum firmware/software version
Bosch IP camera	Firmware version 6.40
DIVAR IP all-in-one 4000, DIVAR IP all-in-one 5000, DIVAR IP all-in-one 6000, DIVAR IP all-in-one 7000 (DIP-72 series, DIP-73 series and DIP-74 series)	DIVAR IP System Manager version 2.3.0 or later
