## Patch installation

Issue	The Temporary Cards feature in BIS Access Engine 4.7 requires a patch to correctly release the block on an original card when the temporary card that replaced it is no longer required.
Topic	<b>BIS-ACE 4.7 Patch for Temporary Cards feature</b>
Description	This document explains how to install the patch for Temporary Cards feature after installing BIS-ACE 4.7

## Prerequisites

- You have installed Building Integration System 4.7 with Access Engine (ACE).
- You intend to use the **Temporary Cards** feature in ACE.

## Procedure

1. Verify that the SHA-256 checksum of this ZIP package matches its checksum as advertised on the download server.
2. Unpack the ZIP package.
3. With Administrator privileges on the ACE server, run the file  
`Patch_ACE_4_7_TempCards.exe`.
4. Reboot the ACE server.
