1 Introduction

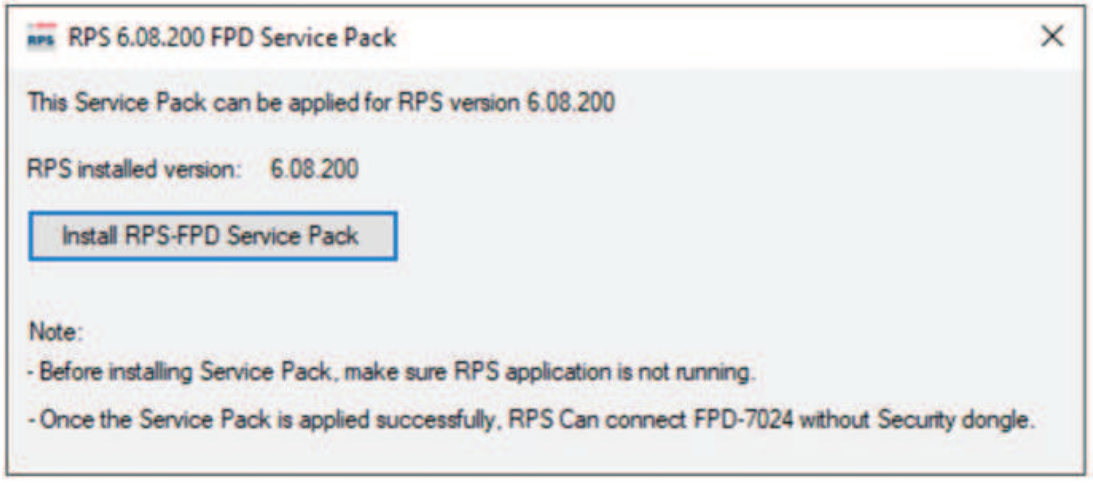
These release notes are for RPS users with version 6.08.200 installed and are related to an optional service pack release supporting the FPD-7024 Fire Alarm Control Panel.

1.1 Prerequisite

RPS version 6.08.200 must be installed in order to install this service pack.

1. Download RPS version. 6.08.200 file and install. Refer to RPS Help for detailed instructions in using RPS
2. Download **RPS-FPD7024-SP1.exe** to a directory accessible to RPS.
3. Launch the **RPS-FPD7024-SP1**.exe file and install.

✓ The installation wizard guides the user through the installation process.



1.2 Requirements

RPS version 6.08.200 is required. This release supports service pack: **RPS-FPD7024-SP1**.

Notice!
Future versions of RPS will not require the installation of service packs in order to use this capability.

2 Service pack RPS-FPD7024-SP1

Whats new

– *RPS programming for FPD-7024 without a dongle, page 5*

2.1 Whats new

This section examines the new features in this service pack release.

2.1.1 RPS programming for FPD-7024 without a dongle

In order to connect and program the control panel using RPS, a Bosch USB dongle is used. Installation of this service pack allows you to connect and program the FPD-7024 control panel without using the Bosch USB security dongle. This service pack does not affect the requirement of a security dongle for other Bosch control panels.
